	Additional information:	The lists valid during the making were used as basis.	
8.2	Exposure controls Personal protective equipment: General protective and hygienic measures:	The usual precautionary measures are to be adhered to when handling chemicals.	
	Respiratory protection:	Not required.	
	Protection of hands:	The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation:	
	Material of gloves:	The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.	
	Penetration time of glove material:	The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.	
	Eye protection:	Goggles recommended during refilling.
