# **SECTION 4: First aid measures**

4.1	Description of first aid measures General information:	Immediately remove any clothing soiled by the product.
	After inhalation:	Supply fresh air and to be sure call for a doctor. In case of unconsciousness place patient stably in side position for transportation.
	After skin contact:	Immediately wash with water and soap and rinse thoroughly. If skin irritation continues, consult a doctor.
	After eye contact:	Rinse opened eye for several minutes under running water. Then consult a doctor.

Revi	ording to 1907/2006/EG, Article 31 sion: 12.07.2021 Version nur I <mark>Print guide</mark>	Page 3 of 8 mber 3 Printing date: 06.12.2022
	After swallowing:	Do not induce vomiting. Call a doctor immediately.
4.2	Most important symptoms and effects, both acute and delayed:	No further relevant information available.
4.3	Indication of any immediate medical attention and special treatment needed:	No further relevant information available.
	TION 5: Firefighting measures	
5.1	Extinguishing media Suitable extinguishing agents:	CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
	For safety reasons unsuitable extinguishing agents:	Water with full jet
5.2	Special hazards arising from the substance or mixture:	No further relevant information available.
5.3	Advice for firefighters Protective equipment:	No special measures required.
SEC	TION 6: Accidental release measures	
6.1	Personal precautions, protective equipment and emergency procedures:	Avoid contact with skin and eyes.
6.2	Environmental precautions:	Do not allow product to reach sewage system or any watercourse. Inform respective authorities in case of seepage into watercourse or sewage system. Do not allow to enter sewers/ surface or ground water.
6.3	Methods and material for containment and cleaning up:	Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose contaminated material as waste according to item 13. Ensure adequate ventilation.
6.4	Reference to other sections	See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.
SEC	TION 7: Handling and storage	
7.1	Precautions for safe handling:	Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols.
	Information about fire - and explosion protection:	No special measures required.
7.2	Conditions for safe storage, including any	y incompatibilities
	Storage: Requirements to be met by storerooms and receptacles:	Protect from heat and direct sunlight.
	Information about storage in one common storage facility:	Not required.

Protective gloves

Protective gloves should be changed regularly, especially after intensive contact with the product. For every workplace a suitable type of protective gloves must be selected. The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Nitrile rubber, NBR (0,4 mm) As there are many different conditions in every day work these indications can only serve as an aid to orientation for the selection of suitable gloves for the handling of chemical

products. By no means can they replace qualifying examinations by the end-user.

These recommendations only apply to the product mentioned in the safety data sheet. When mixing with other substances or under conditions deviant from norm EN 374 a manufacturer of CE-approved gloves should be referred to.

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.

### Penetration time of glove material:

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. The determined penetration times according to EN 374 part III are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.
