### SECTION 4: First aid measures

#### 4.1 Description of first aid measures

**Following inhalation:** Pure wax resp. wax not containing any kind of oil is showing almost no vapour pressure when fluid, for that an inhalative absorption of any toxicologically concerned component can be excluded.

**Following skin contact:** Contact with molten/fluid product may lead to burns. Cool down with cold water immediately, if necessary treat wound in a sterile manner, seek for medical advice.  
Any absorption of paraffin components by means of skin while the wax is solid cannot be expected.

**Following eye contact:** Rinse thoroughly with water, if necessary seek medical advice (when wax is hot/fluid)

**Following ingestion:** Rinse mouth – no further measures necessary. Waxes can be applied as components of pharmaceuticals or food for this reason the question of absorption in the digestive tract after accidental ingestion is irrelevant.
